

CNT ON-CALL ROSTER

USER MANUAL

Crisis Negotiation Team

cntoncall.netlify.app

WHAT IS INSIDE

- | | | |
|---|---------------------------|---|
| 1 | Signing in | Password, and saving the site to your phone |
| 2 | Roster | Everyone by team and role, with tap-to-call |
| 3 | On call now | Who to ring at this moment |
| 4 | On-call calendar | The month, day details and training days |
| 5 | On-call coverage | Handing part of a block to someone else |
| 6 | Weekly shifts | Regular duty hours across the week |
| 7 | Edit roster | Adding and updating members |
| 8 | Admin | Training days and the site password |
| 9 | Everyday questions | Short answers to the common ones |

Shown in day mode; everything works the same in night mode. Phone numbers in the examples are placeholders.

FOR TEAM USE ONLY · contains personal contact details · questions: please contact Victor

SECTION 1

Signing in

The site is password protected because it lists everyone's personal mobile numbers. One password covers the whole team. You only enter it once on each device — after that it opens straight to the roster.

1 Type the password

Ask Victor if you do not have it. It is the same password for everyone.

2 Press Enter

You stay signed in on that device. You will only be asked again if the password is changed, or you use a new phone.

PUT IT ON YOUR HOME SCREEN

On iPhone press Share, then Add to Home Screen. On Android press the menu, then Add to Home screen. It then opens full screen like an app, and you stay signed in.

THE FIRST TIME ONLY

If nobody has set a password yet, the site asks you to choose one and type it twice. Whoever does this should then email the team so everyone has it.

ONCE YOU ARE IN

The same two strips sit at the top of every tab.

1 Who holds the block

The team on call right now, the two-week window it runs, and a countdown to the Thursday 0700 handoff.

2 Day or Night

Switches the whole site between light and dark. It follows your phone at first, then remembers what you pick.

3 The six tabs

Roster, On call now, On-call calendar, On-call coverage, Weekly shifts and Edit roster. The one you are on is underlined.

SECTION 2 · TAB ONE

Roster

The full team, grouped by which team they are on and what they do. This is the tab to use when you know who you want and just need their number.

1 **CRISIS NEGOTIATION TEAM · ON-CALL ROTATION**
BLUE TEAM ON CALL
8/6 0700 → 8/20 0700

- 1 Who is on call**
The banner always names the team holding the block, with the handoff date and a countdown.
- 2 Search**
Type a name, call sign or role. Works together with the filters.
- 3 Filters**
Narrow to one team, to tactical dispatchers, or to whoever is inside their shift hours right now.
- 4 Team heading**
The team currently on call sorts to the top and is marked ON CALL NOW.
- 5 Grouped by role**
Leadership, then Negotiators, then Tactical Dispatchers, then Tech and support.
- 6 On duty or on call**
ON DUTY means they are inside their listed hours right now. ON CALL means the team holds the block but they are outside those hours.
- 7 Coverage note**
If someone has handed part of their block to another member, it says so in amber on their card.
- 8 Tap to call**
Every number is a button. On a phone it dials straight away.

SECTION 3 • TAB TWO

On call now

The tab to open during a call-out. It answers one question: who do I ring, right now. Coverage swaps are already worked out, so the name on screen is the person to actually contact.

1 The moment being shown

Defaults to right now and refreshes on its own. The LIVE badge turns amber and reads PREVIEW if you look at another time.

2 Check another time

Set a date and time, or step by the hour, to see who will be on call then. NOW returns to live.

3 When it next changes

Tells you how long the current call list stays valid — useful before sending someone to the field.

4 Call-sign order

N1, N3, N5 and so on. Work down the list. Dispatchers follow in their own section.

5 A covered slot

The row keeps the original call sign but shows the covering member's name, with an amber line saying who they are covering and until when.

6 On duty or on call

Whether that person is also inside their regular shift hours at this moment.

7 Two numbers

Personal mobile first, work mobile second. Both dial on a tap.

SECTION 4 · TAB THREE

A month at a glance, coloured by which team holds each day. Use it to plan ahead, check a handoff date, or look up a training day.

A panel opens showing every person on call that date and the exact hours they hold, with coverage already split out — for example 0000–1000 J. Aguirre, then 1000–1400 K. Wiebe covering, then 1400–2400 J. Aguirre. Training details appear at the top. Prev and Next walk day by day.

SECTION 5 · TAB FOUR

On-call coverage

Where you hand part of your on-call block to somebody on the other team. You can give away a whole fortnight, a single night, or anything in between, and split it between several people.

1 Navigation arrows

2 CURRENT BLOCK

3 Team member name and call sign

4 Coverage status and ADD COVER button

5 Timeline bar and coverage details

- 1 Pick the block**
Arrows step two weeks at a time, so you can arrange cover well in advance. CURRENT BLOCK returns to now.
- 2 Add cover**
Opens a short form: start date and time, end date and time, and who is taking it. Presets fill in a whole block, one day, a weekend or a 12-hour shift.
- 3 The two-week bar**
One bar per person, dated underneath. Red blocks are the parts somebody else is holding, labelled with their call sign.
- 4 How much is covered**
A running total, or FULLY COVERED when the whole block has been handed over.
- 5 Every window listed**
Exact start and end times with the covering member, each one removable.

TWO MISTAKES IT WILL NOT LET YOU MAKE

You cannot double-book yourself — if a window overlaps one already assigned it tells you which. And you cannot put the same person in two places at once. Coverage always comes from the team that is off call, and dispatchers are covered by other dispatchers.

SECTION 6 • TAB FIVE

Weekly shifts

Everyone's regular working hours across a week. This is separate from the on-call rotation — it shows when people are normally at work, which is useful when you are deciding who to try first.

**1 One row per person**

Grouped by team, with tactical dispatchers included under their own team colour.

2 Bars are working hours

A bar that runs past midnight continues on the next day, so night shifts read correctly.

3 The now line

The vertical line marks the current moment, so you can see at a glance who is at work.

4 Faded bars

Somebody with no fixed hours — tech services, the psychologist — shows as a faint band across the whole week.

THESE HOURS ARE NOT YOUR ON-CALL WINDOW

This tab shows when people normally work. It does not limit who can be called out. While your team holds the two-week block you are on call around the clock, whatever this page shows.

SECTION 7 · TAB SIX

Edit roster

Where the roster is kept up to date. Anyone signed in can make a change, and it saves for the whole team straight away — there is nothing to send round afterwards.

- | | |
|--|--|
| <p>1 Live status
Confirms the device is connected and shows when the roster last changed. If it turns amber, read what it says — it explains the problem.</p> <p>2 Refresh
Pulls the latest copy immediately instead of waiting for the automatic check.</p> | <p>3 Add member
Opens the same form as Edit: call sign, name, title, team, group, schedule, phone numbers, carrier and a note.</p> <p>4 Edit
Change anything, or remove somebody. Removing also clears any coverage they were part of.</p> |
|--|--|

WHAT IT CHECKS BEFORE SAVING

Call signs must be unique — it will tell you who already has one. Phone numbers can be typed any way you like and are tied to 949-555-0100. A schedule set to On-call 24/7 or Off roster hides the days and hours fields, since they do not apply.

SECTION 8 • BOTTOM OF THE PAGE

Admin

Scroll to the very bottom of any tab and open Admin. Two things live here: training days, and the site password.

The screenshot shows the Admin page with a top navigation bar containing: ROSTER, ON CALL NOW, ON-CALL CALENDAR, ON-CALL COVERAGE, WEEKLY SHIFTS, and EDIT ROSTER (which is highlighted). Below the navigation bar is the ADMIN section. The first section is TRAINING DAYS, with a sub-header 'Marks a date on the On-Call Calendar. Tap the day to see the full details.' It contains four input fields: DATE (2026-10-28), TITLE (CNT Training Day), HOURS (1800-2100), and LOCATION (EOC). Below these is a HOSTS field with 'Office of Professional Standards' and an 'ADD TRAINING DAY' button. The second section is SITE PASSWORD, with a sub-header 'Changes the password everyone uses. Everyone is signed out until they have the new one.' It contains two input fields: NEW PASSWORD and TYPE IT AGAIN, both with masked characters, and a 'CHANGE PASSWORD' button. Numbered callouts 1 through 4 point to specific elements: 1 points to the TITLE field, 2 points to the HOSTS field, 3 points to the 'EDIT' button in the training day list, and 4 points to the NEW PASSWORD field.

- 1 Give it a title**
Free text, so it can read CNT Training Day one month and Joint Training Day the next.
- 2 Add the detail**
Hours, location and hosts all appear when somebody taps that day on the calendar.

- 3 Edit or remove**
The list shows the month you are viewing on the calendar first. One training day per date.
- 4 Password**
Type the new one twice. You are asked to confirm, and reminded to email the team so nobody is locked out.

WHAT YOU SEE WHEN YOU CHANGE IT

The dialog box has a title 'cntoncall.netlify.app says' and contains the following text: 'Are you sure you are changing the password?', 'If so, please email and notify everyone at PS_CNT.', and 'Everyone will be signed out until they have the new password.' At the bottom are two buttons: 'Cancel' and 'OK'.

The site asks you to confirm before it changes anything, and reminds you to tell the team. Nothing is saved until you press OK.

Once changed, every other phone is signed out. Send the new password round straight away, or people will be locked out at the worst possible moment.

SECTION 9

Everyday questions

Who is on call this second?

Open On call now. The top row of the call-out list is where to start. Coverage is already applied, so ring the name you see.

When does the team change over?

Every other Thursday at 0700. The banner on the Roster tab counts down to it, and the calendar splits that Thursday in half.

My team is on call but I am off shift. Am I still on call?

Yes. While your team holds the block you are on call around the clock. The hours next to your name are your normal working shift, nothing more.

I need somebody to cover Saturday night.

On-call coverage, find your row, Add cover. Set Saturday 1800 to Sunday 0600, pick somebody from the other team, save. It is live immediately.

Somebody changed their mobile number.

Edit roster, find them, Edit, change the number, Save. Everyone else sees it within a minute.

I changed something and my partner cannot see it.

Ask them to press Refresh on the Edit roster tab. If the bar there is amber, read what it says — it names the problem.

I am on a new phone.

You will be asked for the team password once. Everything else is already there.

The screen is too bright at night.

Use the Day / Night switch at the top right. It remembers your choice.

I forgot the password.

Contact Victor. It cannot be looked up — it is stored scrambled — but it can be reset.

Who is on call next Saturday?

Either set that date on On call now, or open the calendar and tap the day. Both show coverage already worked out.

Where do training days come from?

Admin, at the very bottom of the page. Once added they show on the calendar in teal, with hours, location and hosts.

Are dispatchers part of the rotation?

Yes. TOC call signs sit inside Blue and Red like everyone else, listed after the negotiators in the call-out order.

Can somebody cover just part of a day?

Yes. Coverage is set by exact date and time, so a single night or a few hours works the same as a whole fortnight.

IF SOMETHING LOOKS WRONG

Do not work around it. Tell Victor what the site says, word for word — the messages are written to name the exact problem, and that is usually enough to fix it in a minute.
